Creating a Patient Summary in Best Practice

Overview

This guide provides a simple overview on creating a patient summary in Best Practice.

If you have any questions or require any further assistance, Please contact the Medical-Objects Helpdesk on (07) 5456 6000.

Creating a Patient Summary

1. In Best Practice, choose File/Open patient.

2. Choose the patient you wish to create the summary for and click Open.

3. When in the patient record, choose File, and Print Health Summary.

- 1 Overview
- 2 Creating a Patient Summary
- 3 Sending

4. Tick the items you wish to include in the summary and then click the View button.

5. This creates and opens the summary in the letter writer window.
