Separating Documents and Letters

Overview

Some Medical providers prefer to import Referrals, Specialist letters, or Discharge Summaries into the relevant Letters/Documents tab of the patients record. This can be performed in Medical Director 2 or 3. Pathology results will still continue to go into the Results tab.

Note: Please note that **steps 1-4** will need to be repeated on each Medical Director workstation.

Medical Director Sorting Logic

Medical Director allocates messages according to keywords in report titles.

The keywords are "Letter", "Document", "Correspondence" or "Summary".

OBR-24 is not used at all for report allocation as advised by the Australian Standard: 4 Observation Reporting - HL7AUSD-STD-OO-ADRM-2021.1 - HL7 Australia "This field is required in Australian implementations to indicate to the placer system which clinical area to display the results.'

For ORU and REF without a keyword see the "Message Type no Keywords Variations Table" below.

MDM behaviour has not been confirmed.

Variations Table

Column configuration titles below can be set in Medical Director Tools Options RSD

Keyword /s	Status and Discharge Summary Report Storage = Documents Correspondence Storage = Letters	Status and Discharge Summary Report Storage = Letters Correspondence Storage = Documents	Status and Discharge Summary Report Storage = Letters Correspondence Storage = Letters	Status and Discharge Summary Report Storage = Documents Correspondence Storage = Documents
Discharge	Document	Letter	Letters	Documents
Discharge Word	Document	Letter	Letters	Documents
Word Discharge	Letter	Document	Letters	Documents
Discharge Summary	Document	Letter	Letters	Documents
Summary	Letter	Document	Letters	Documents
Summary Word	Letter	Document	Letters	Documents
Word Summary	Letter	Document	Letters	Documents
Letter	Letter	Document	Letters	Documents
Letter Word	Letter	Document	Letters	Documents
Word Letter	Letter	Document	Letters	Documents
Correspond ence	Letter	Document	Letters	Documents
Correspond ence Word	Letter	Document	Letters	Documents

ORU	Results	Results
REF	Letter	Document

Configuring Medical Director RSD

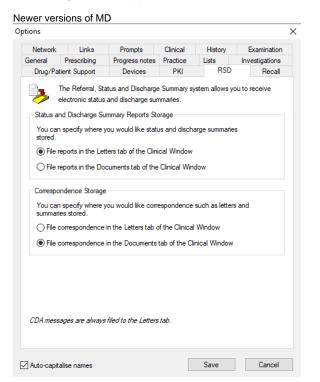

1. Open Medical Director (MD).

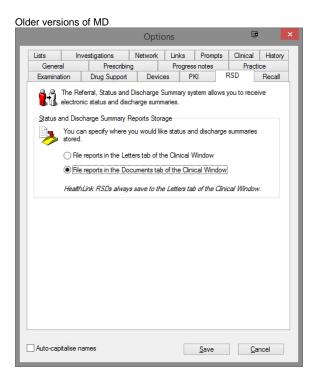

2. Once Medical Director (MD) has opened, select Tools then Options.

3. The following window will appear. Select the RSD tab.

4. Tick the radio button for File reports in the Documents or Letters tab of the Clinical Window (Choose as required).

Note:			
The configuration is			
The configuration is a	now complete fo	r Medical Dir	ector.

Configuring Medical Objects Capricorn RSD

1. Double click the HL7 tray icon.

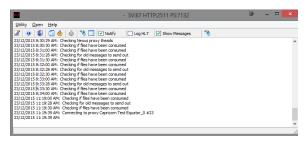

Note:

If the Capricorn HL7 tray icon is not visible, open Capricorn from Start Menu > All Programs > Medical-Objects > Medical Objects Capricorn or from C:\MO\Capricorn\Capricorn.exe.

If Capricorn is running as a service, you must stop the service before opening the tray icon. For more information, Please see this guide.

2. The Log window is displayed.

3. Click the Edit Server Properties icon.

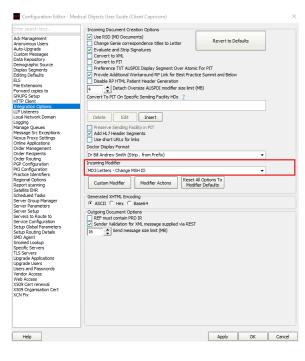

4. Click on the Integration Options.

5. Tick the Use RSD (MD Documents) box.

Help	Apply OK	Cancel

6. Set the correct modifier for the Medical Director Software.

Medical Director 3 --> MD3 Letters - Change MSH ID

7. The configuration is complete. Click Apply and OK.

The Results

- 1. The Letters will be imported into the MD Holding File.
- 2. Once the letter has been processed by the operator the letter will be transferred to the relevant chosen area shown below.
